## For Research Use Only. Not for Use in Diagnostic Procedures.

<b>Applications:</b> W, IP	<b>Reactivity:</b> H Mk	<b>Sensitivity:</b> Endogenous	<b>MW (kDa):</b> 65	<b>Source/Isotype:</b> Rabbit	UniProt ID: #P23368	Entrez-Gene Id: 4200
Product Usage Information		<b>Application</b> Western Blotting Immunoprecipitation			<b>Dilution</b> 1:1000 1:50	
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 $\mu$ g/ml BSA and 50% glycerol. Store at – 20°C. Do not aliquot the antibody.				
Specificity/Sensitivity		Malic Enzyme 2 Antibody recognizes endogenous levels of total malic enzyme 2 protein.				
Source / Purification		Polyclonal antibodies are produced by immunizing animals with a synthetic peptide corresponding to residues surrounding Gly450 of human malic enzyme 2 protein. Antibodies are purified by protein A and peptide affinity chromatography.				
Background		Cytosolic malic enzyme (ME1) catalyzes the conversion of malate and NADP <sup>+</sup> to pyruvate and NADPH (1,2). NADPH is then used for fatty acid biosynthesis and lipogenesis (1,2). Cytosolic malic enzyme was shown to mediate high fat diet-induced adiposity (1). Mitochondrial malic enzyme (ME2) preferentially uses NAD <sup>+</sup> to catalyze the conversion of malate to pyruvate with the concomitant generation of NADH (2). Recent studies have demonstrated that the tumor suppressor p53 regulates cell metabolism and proliferation by repressing the expression of both cytosolic malic enzyme and mitochondrial malic enzyme (3).

Species Reacti	vity	Species reactivity is de	etermined by testin	g in at least one approve	ed application (e.g.,	western blot).
Western Blot Buffer		IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.				
Applications Key		W: Western Blotting IP: Immunoprecipitation				
Cross-Reactivity Key		H: Human Mk: Monkey
