#2693	Web:	info@cellsignal.com cellsignal.com		
#	3 Trask Lane   Danvers   Massachusetts   01923   USA			
For Research Use Only. Not for Use in Diagnostic Procedures.				

Applications: W	<b>Reactivity:</b> H R	<b>Sensitivity:</b> Endogenous	<b>MW (kDa):</b> 75	<b>Source/Isotype:</b> Rabbit	<b>UniProt ID:</b> #P08138	Entrez-Gene Id 4804	
Product Usage Information		<b>Application</b> Western Blotting			Dilution 1:1000		
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA and 50% glycerol. Store at – 20°C. Do not aliquot the antibody.					
Specificity/Sens	sitivity	p75NTR Antibody detects endogenous levels of total p75NTR protein.					
Species predict based on 100% homology		Mouse					
Source / Purific	ation	Polyclonal antibodies are produced by immunizing animals with a synthetic peptide corresponding to the sequence of human p75NTR. Antibodies are purified by peptide affinity chromatography.					
Background		The p75 neurotrophin receptor (p75NTR), a member of the TNF receptor superfamily, is distinguished by multiple cysteine-rich ligand-binding domains, a single transmembrane sequence, and a noncatalytic cytoplasmic domain (1). p75NTR displays paradoxical functions when acting alone or with other receptor proteins. Working in concert with Trk receptors, p75NTR recognizes neurotrophins and transmits trophic signals into the cell. Both p75NTR and TrkA are required to activate PI3K-Akt signaling, while TrkA can individually activate the MAP kinase pathway. In contrast, p75NTR, possibly through JNK, ensures appropriate apoptosis of injured neurons and improperly targeted neonatal neurons (2).					
		The p75NTR protein undergoes sequential cleavage similar to APP and Notch. First, $\alpha$ -secretase removes the p75NTR ectodomain, eliminating ligand-mediated signaling. At this point, the membrane- tethered cleavage product can still fine-tune Trk-mediated trophic actions. $\gamma$ -secretase cleaves within the transmembrane domain to liberate the cytoplasmic tail from its membrane anchor and allow the p75NTR intracellular domain to translocate to the nucleus (3,4).

Species Reactiv	rity	Species reactivity is d	letermined by testin	g in at least one approve	ed application (e.g.,	western blot).	
Western Blot B	uffer		PORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X S, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.				
Applications Ke	ey	W: Western Blotting					
Cross-Reactivit	у Кеу	H: Human R: Rat
