For Research Use Only. Not for Use in Diagnostic Procedures

Applications: IP	Reactivity: H M R Hm	Sensitivity: Endogenous	MW (kDa): 60	Source/Isotype: Mouse IgG1	UniProt ID: #Q9Y243, #P31749	Entrez-Gene Id 10000, 207
Product Usage Information		Application Immunoprecipitation			Dilution 1:100	
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.				
Specificity/Sensitivity		Akt (5G3) Mouse mAb detects endogenous levels of Akt1 and Akt3. This antibody does not cross-react with other related proteins.				
Source / Purification		Monoclonal antibody is produced by immunizing animals with an Akt1 recombinant protein containing human Akt1 residues 140-480.				
Background		This protein kinase is wortmannin-sensitive activation loop phosp terminus at Ser473. The been identified as marictor and Sin1 (5,6). A inactivation of several caspase-9. PTEN phos LY294002 is a specific glycogen synthesis the play a role in insulin siglycogen synthesis, a phosphorylation and kinase inhibitors p27 directly phosphorylation.	activated by insulin pathway involving horylation at Thr30 he previously elusiv mmalian target of lakt promotes cell sultargets, including phatase is a major PI3 kinase inhibitor rough phosphorylatimulation of glucokt is involved in cell degradation of cycl Kip1 (15) and p21 W ng mTOR in a rapaphorylates and inace	and various growth ar PI3 kinase (2,3). Akt is 8 by PDK1 (4) and by pe PDK2 responsible foi apamycin (mTOR) in a rivival by inhibiting apc Bad (7), forkhead trans negative regulator of tar (11). Another essentiation and inactivation of se transport (12). In adcycle regulation by pre in D1 (14) and by negar (Jaf1/Cip1 (16). Akt also mycin-sensitive comple	lling cell survival and a nd survival factors to fu activated by phospholi hosphorylation within r phosphorylation of Al rapamycin-insensitive optosis through phospl cription factors (8), c-R the PI3K/Akt signaling p al Akt function is the re of GSK-3α and β (12,13). dition to its role in surveventing GSK-3β-mediatively regulating the cyplays a critical role in cex containing raptor (1' an inhibitor of mTOR v	nnction in a pid binding and the carboxy kt at Ser473 has complex with norylation and af (9), and pathway (10). gulation of . Akt may also vival and ated clin-dependent tell growth by 7). More

Species Reactivity

Species reactivity is determined by testing in at least one approved application (e.g., western blot).

Applications Key

IP: Immunoprecipitation

Limited Uses

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
