| Storage                      |                                | Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA, 50% glycerol and less than<br>0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.   |  |   |   |  |  |
| Specificity/Sensitivity      |                                | Phospho-Akt (Thr308) (244F9) Rabbit mAb detects endogenous levels of Akt only when phosphorylated at threonine 308.   |  |   |   |  |  |
| Source / Purification        |                                | Monoclonal antibody is produced by immunizing animals with a synthetic phosphopeptide corresponding to residues around Thr308 of mouse Akt.   |  |   |   |  |  |
| Background                   |                                | Akt, also referred to as<br>This protein kinase is a<br>wortmannin-sensitive p<br>activation loop phosph-<br>terminus at Ser473. The<br>been identified as marr<br>rictor and Sin1 (5,6). Ak<br>inactivation of several t<br>caspase-9. PTEN phosp<br>LY294002 is a specific P<br>glycogen synthesis thro<br>play a role in insulin sti<br>glycogen synthesis, Akt<br>phosphorylation and de<br>kinase inhibitors p27 Ki<br>directly phosphorylatin<br>importantly, Akt phospl<br>raptor complex (18,19).   | ctivated by insulin<br>bathway involving<br>orylation at Thr308<br>e previously elusive<br>malian target of r<br>t promotes cell su<br>argets, including E<br>hatase is a major r<br>13 kinase inhibitor<br>ugh phosphorylat<br>mulation of glucos<br>is involved in cell<br>egradation of cycli<br>p1 (15) and p21 W<br>g mTOR in a rapar<br>horylates and inac | and various growth ar<br>PI3 kinase (2,3). Akt is<br>3 by PDK1 (4) and by p<br>e PDK2 responsible for<br>apamycin (mTOR) in a<br>rvival by inhibiting apo<br>Bad (7), forkhead trans<br>negative regulator of t<br>to (11). Another essentia<br>tion and inactivation o<br>se transport (12). In ad<br>cycle regulation by pro<br>n D1 (14) and by nega<br>laf1/Cip1 (16). Akt also<br>nycin-sensitive comple | nd survival factors to fu<br>activated by phospholi<br>hosphorylation within<br>r phosphorylation of Al<br>rapamycin-insensitive<br>optosis through phosph<br>cription factors (8), c-R<br>he PI3K/Akt signaling p<br>al Akt function is the re<br>f GSK-3 $\alpha$ and $\beta$ (12,13).<br>dition to its role in surv<br>eventing GSK-3 $\beta$ -media<br>tively regulating the cy<br>plays a critical role in co<br>ex containing raptor (12) | inction in a<br>pid binding and<br>the carboxy<br>kt at Ser473 has<br>complex with<br>norylation and<br>af (9), and<br>bathway (10).<br>gulation of<br>. Akt may also<br><i>v</i> ival and<br>ated<br>clin-dependent<br>cell growth by<br>7). More |  |

| Species Reactivity     | Species reactivity is determined by testing in at least one approved application (e.g., western blot).  |  |  |  |  |
|------------------------|---|--|--|--|--|
| Western Blot Buffer    | IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X<br>TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.   |  |  |  |  |

| Limited Uses           | Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.   |  |  |  |  |
|                        | Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purpose, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products. |  |  |  |  |
