**Storage**

Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 µg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.

**Specificity / Sensitivity**

CaMKII (pan) (D11A10) Rabbit mAb detects endogenous levels of total CaMKII protein. The peptide sequence used as the antigen is 100% conserved between CaMKII-alpha, gamma and delta, and 88% conserved in CaMKII-beta.

**Species Reactivity:**

Human, Mouse, Rat

**Source / Purification**

Monoclonal antibody is produced by immunizing animals with a synthetic peptide surrounding Val184 of human CaMKII-alpha.

**Background**

CaMKII is an important member of the calcium/calmodulin-activated protein kinase family, functioning in neural synaptic stimulation and T cell receptor signaling (1,2). CaMKII has catalytic and regulatory domains. Ca²⁺/calmodulin binding to the CaMKII regulatory domain relieves autoinhibition and activates the kinase (3). The activated CaMKII further autophosphorylates at Thr286 to render the kinase constitutively active (3). The threonine phosphorylation state of CaMKII can be regulated through PP1/PKA. PP1 (protein phosphatase 1) dephosphorylates phospho-CaMKII at Thr286. PKA (protein kinase A) prevents phospho-CaMKII (Thr286) dephosphorylation through an inhibitory effect on PP1 (4).

**Species Reactivity**

- Human
- Mouse
- Rat

**MW (kDa):** 60, 50

**Source/Isotype:** Rabbit IgG

**UniProt ID:** Q9UQM7, Q13554, Q13557, Q13555

**Entrez-Gene ID:** 815, 816, 817, 818

**APPLICATIONS KEY**

- WB: Western Blot
- IP: Immunoprecipitation
- IH: Immunohistochemistry
- ChIP: Chromatin immunoprecipitation
- IF: Immunofluorescence
- F: Flow Cytometry
- EP: ELISA-Peptide

**CROSS-REACTIVITY KEY**

- Human
- Mouse
- Rat
- Hamster
- Monkey
- Mink
- Chicken
- D. melanogaster
- Xenopus
- Zebrafish
- Beagle
- Dog
- Pig
- B: S.
- Caenorhabditis
- C. elegans
- H: Horse
- All: all species expected

**IMPORTANT:** For primary antibodies recommended for western blotting applications, we recommend incubating the membrane with diluted antibody at 4°C with gentle shaking overnight. Please refer to the product-specific protocol for our antibody diluent recommendation.
