<b>Storage</b>	Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 µg/ml BSA and 50% glycerol. Store at -20°C. Do not aliquot the antibody.					
<b>Specificity/Sensitivity</b>	DUSP3/VHR Antibody detects endogenous levels of total DUSP3 protein. This antibody does not cross-react with other dual-specific phosphatases.					
<b>Source / Purification</b>	Polyclonal antibodies are produced by immunizing animals with a synthetic peptide corresponding to human DUSP3. Antibodies are purified by protein A and peptide affinity chromatography.					
<b>Background</b>	DUSP3, also known as VHR (VH1 related) is a small dual-specific phosphatase with specificity for MAP kinase ERK1/2 and JNK, but not for p38 MAPK (1,2). Unlike most of the dual-specific phosphatases, which have inducible expression patterns, DUSP3 is constitutively expressed (2). In antigen stimulated T cells, DUSP3 is phosphorylated by ZAP-70 at Tyr138 (3). Tyr138 phosphorylation is required for DUSP3 to down-regulate the ERK and JNK pathways (3).

<b>Species Reactivity</b>	Species reactivity is determined by testing in at least one approved application (e.g., western blot).
<b>Western Blot Buffer</b>	<b>IMPORTANT:</b> For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.
