For Research Use Only. Not for Use in Diagnostic Procedures

Applications: W	Reactivity: Rab	Source/Isotype: Mouse
Product Usage		Recommended Antibody Dilution:
Information		1:2000
Storage		Supplied in 136 mM NaCl, 2.6 mM KCl, 12 mM sodium phosphate (pH 7.4) dibasic, 2 mg/ml BSA, and 50% glycerol. Store at –20°C. Do not aliquot the antibodies.
Specificity/Sensitivity		Mouse Anti-rabbit IgG (Conformation Specific) (L27A9) mAb (HRP Conjugate) recognizes the native rabbit IgG. This antibody may cross react with denatured IgG at high concentrations.
Source / Purification		Monoclonal antibody is produced by immunizing animals with native total rabbit IgG.
Description		Affinity purified mouse anti-rabbit IgG (Conformation Specific) HRP Conjugate antibody.
Background		Mouse Anti-Rabbit IgG (Conformation Specific) (L27A9) mAb only reacts with native IgG and does not bind to the denatured and reduced rabbit IgG heavy chain or light chain. When performing immunopreciptiation (IP) followed by western blotting, the denatured rabbit IgG light and heavy chains of the primary antibody used for IP run at approximately 25 and 50 kD, respectively, on the subsequent western blot and can often obscure bands of proteins that have similar molecular weights. Using Mouse Anti-Rabbit IgG (Conformation Specific) (L27A9) mAb as a secondary antibody will eliminate this problem.
Species Reactivity		Species reactivity is determined by testing in at least one approved application (e.g., western blot).
Western Blot Buffer		IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.
Applications Key		W: Western Blotting
Cross-Reactivity Key		Rab: Rabbit
