Specificity/Sensitivity		TNFRSF8/CD30 (E4L4I) XP <sup>®</sup> Rabbit mAb recognizes endogenous levels of total TNFRSF8/CD30 protein. This antibody is predicted to detect CD30V, which is a truncated isoform that consists of the CD30 cytoplasmic domain. Non-specific staining was observed in the epithelium of mouse prostate tissue.				
Source / Purification		Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to residues surrounding Leu500 of human TNFRSF8/CD30 protein.
