Nataba (Dacac) VD®	A and azide free) ver	rsion of this product see	product #17635.	
	Notch2 (D76A6) XP <sup>®</sup> Rabbit mAb recognizes endogenous levels of total Notch2 protein. Species cross-reactivity for IHC-P is human only.			
	Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to residues surrounding Ala2378 of human Notch2 protein.			
development and the assembled as hetero domain, a single-pass domain, NICD) (2). Bi heterodimer dissocia	e determination of c dimeric proteins, wi s transmembrane d nding of Notch rece tion, exposing the r	tell fate (1). Mature Notch th each dimer composed omain, and a smaller cyt eptors to ligands of the D eceptors to proteolytic cl	n receptors are prod I of a large extracel oplasmic subunit (I elta-Serrate-Lag2 (I leavages; these res	cessed and llular ligand-binding Notch intracellular DSL) family triggers ult in release of the
Notch2 is a member (5).	of the Notch family	and mutation in Notch2	is associated with A	Alagille syndrome

TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight.

Applications Key

W: Western Blotting IP: Immunoprecipitation IHC-P: Immunohistochemistry (Paraffin) IF-IC: Immunofluorescence (Immunocytochemistry) FC-FP: Flow Cytometry (Fixed/Permeabilized)

Cross-Reactivity Key H: Human M: Mouse R: Rat

## **Limited Uses**

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party. whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
