Specificity/Sen	sitivity	Phospho-c-Raf (Ser289/296/301) Antibody detects endogenous levels of c-Raf protein only when phosphorylated at either Ser289, Ser296 or Ser301.					
Species predict based on 100% homology		Rat					
Source / Purifi	cation	Polyclonal antibodies are produced by immunizing animals with a synthetic phosphopeptide corresponding to residues surrounding Ser289/296/301 of human c-Raf. Antibodies are purified by protein A and peptide affinity chromatography.
