For Research Use Only. Not for Use in Diagnostic Procedures.

| Applications: W, IHC-P, IF-IC | Reactivity: H M R Mk | Sensitivity: Endogenous | MW (kDa): 55 | Source/Isotype: Rabbit IgG | UniProt ID: #P07437 | Entrez-Gene Id: 203068 |
|--------------------------------------|--------------------------------|--|------------------------|--------------------------------------|------------------------|------------------------------------|
| Product Usage Information | 2 | Application Western Blotting Immunohistochemis Immunofluorescence | , | istry) | | Dilution 1:1000 1:400 1:100 |
| Storage | | Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 μg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody. | | | | |
| Specificity/Sensitivity | | β -Tubulin (D2N5G) Rabbit mAb recognizes endogenous levels of total β -tubulin protein. | | | | |
| Source / Purification | | Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to the amino terminus of human β -tubulin protein. | | | | |
| Background | | The cytoskeleton consists of three types of cytosolic fibers: microtubules, microfilaments (actin filaments), and intermediate filaments. Globular tubulin subunits comprise the microtubule building block, with α/β -tubulin heterodimers forming the tubulin subunit common to all eukaryotic cells. γ -tubulin is required to nucleate polymerization of tubulin subunits to form microtubule polymers. Many cell movements are mediated by microtubule action, including the beating of cilia and flagella, cytoplasmic transport of membrane vesicles, chromosome alignment during meiosis/mitosis, and nerve-cell axon migration. These movements result from competitive microtubule polymerization and depolymerization or through the actions of microtubule motor proteins (1). | | | | |
| Background References | | 1. Westermann, S. an | d Weber, K. (2003) Λ | lat Rev Mol Cell Biol 4, 93 | 38-47. | |
| Species Reacti | ivity | Species reactivity is d | etermined by testin | g in at least one approve | ed application (e.g., | western blot). |
| Western Blot Buffer | | IMPORTANT: For western blots, incubate membrane with diluted primary antibody in 5% w/v BSA, 1X TBS, 0.1% Tween® 20 at 4°C with gentle shaking, overnight. | | | | |
| Applications Key | | W: Western Blotting IHC-P: Immunohistochemistry (Paraffin) IF-IC: Immunofluorescence (Immunocytochemistry) | | | | |
| Cross-Reactivity Key | | H: Human M: Mouse | R: Rat Mk: Monkey | | | |
