3 Trask Lane | Danvers | Massachusetts | 01923 | USA

For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: W, IP, IHC-P, IF-IC	Reactivity: H M R Mk	Sensitivity: Endogenous	MW (kDa): 36	Source/Isotype: Rabbit IgG	UniProt ID: #Q15475	Entrez-Gene Id: 6495	
			50	Kabbit Ige	#U		
Product Usage		Application				Dilution	
Information		Western Blotting				1:1000	
		Immunoprecipitation				1:50	
		Immunohistochemist	ry (Paraffin)			1:100	
		Immunofluorescence	(Immunocytochem	istry)		1:400	
Storage		Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 µg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.					
		For a carrier free (BSA	and azide free) ver	sion of this product see	product #73583.		
Specificity/Sensitivity		SIX1 (D5S2S) Rabbit mAb recognizes endogenous levels of total SIX1 protein.					
Source / Purification		Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to residues surrounding Asp269 of human SIX1 protein.					
Background		Sine oculis homeobox (SIX) proteins belong to a family of evolutionarily conserved transcription factors discovered in <i>Drosophila</i> mutant screens for embryonic eye development genes (1-3). The prototypical family member (<i>sine oculis, so</i>) was named for eyeless embryos carrying mutations in a gene highly conserved among vertebrates, including humans (<i>SIX1</i>) (4). A total of six family members (SIX1-6) have been identified in vertebrates. Each SIX protein contains a homeobox nucleic acid recognition domain (HD) with a DNA-binding helix-turn-helix motif and an adjacent SIX domain, which may be involved in regulating protein-protein interactions (5). In addition to their critical functions during embryonic organogenesis, research studies suggest that SIX proteins play additional roles in postnatal cell cycle regulation, with potentially important implications in tumorigenesis (6,7). In contrast to the <i>Drosophila</i> ortholog, the vertebrate <i>SIX1</i> gene product does not play a critical role in embryonic eye development. Vertebrate SIX1 is required for development of mesoderm- and neural crest-derived lineages, and male reproductive tissues (8-10). SIX1 has also been shown to regulate transcription of MyoD in adult muscle progenitor cells during postnatal muscle development (11). A mechanistic role for SIX1 in cell cycle regulation is supported by research studies showing increased SIX1 expression in various cancer subtypes, including breast, ovarian, and hepatocellular carcinoma (6,12,13).

Limited Uses	Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.
	Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purpose, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
