## For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: R IF-F, FC-FP, FC-L	Reactivity: H M	<b>Sensitivity:</b> Endogenous	<b>Source/Isotype:</b> Rat IgG2a kappa	UniProt ID: #P06800	Entrez-Gene Id: 19264
Product Usage		For optimal flow cytometry results, we recommend 0.25 $\mu g$ of antibody per test.			
Information		Application Immunofluorescence (Frozen) Flow Cytometry (Fixed/Permeabilized) Flow Cytometry (Live)		<b>Dilution</b> 1:400 - 1:800 1:200 1:200	
Storage		Supplied in 10 mM NaH2PO4, 150 mM NaCl, 0.09% NaN3, 0.1% gelatin, pH 7.2. This product is stable for 12 months when stored at 4°C. Do not aliquot the antibody. Protect from light. Do not freeze.			
Specificity/Sensitivity		CD45R/B220 (RA3-6B2) Rat mAb (FITC Conjugate) recognizes endogenous levels of total CD45R/B220 protein. This antibody detects an epitope within the extracellular domain.			
Source / Purification		This monoclonal antibody was purified from tissue culture supernatant via affinity chromatography. The purified antibody was conjugated under optimal conditions, with unreacted dye removed from the preparation.			
Description		This Cell Signaling Technology antibody is conjugated to FITC and tested in-house for direct flow cytometric analysis in mouse cells.			
Background		The protein phosphatase (PTP) receptor CD45 is a type I transmembrane protein comprise intracellular tyrosine phosphatase domains and a variable extracellular domain generated alternative splicing (1). The catalytic activity of CD45 is a function of the first phosphatase of while the second phosphatase domain (D2) may interact with and stabilize the first domain recruit/bind substrates (2,3). CD45 interacts directly with antigen receptor complex protein activates Src family kinases involved in the regulation of T- and B-cell antigen receptor sign Specifically, CD45 dephosphorylates Src-family kinases Lck and Fyn at their conserved negaregulatory carboxy-terminal tyrosine residues and upregulates kinase activity. Conversely, indicate that CD45 can also inhibit Lck and Fyn by dephosphorylating their positive regulate autophosphorylation site. CD45 appears to be both a positive and a negative regulator that signals depending on specific stimuli and cell type (1). Human leukocytes including lymphoeosinophils, monocytes, basophils, and neutrophils express CD45, while erythrocytes and negative for CD45 expression (4).  The RA3-6B2 clone is raised against an isoform of CD45 known as CD45R/B220. CD45R/B22 used as a marker for B cells, T cell subsets, and NK cell subsets in both human and mouse			ar domain generated by the first phosphatase domain (D1) bilize the first domain, or ptor complex proteins or antigen receptor signaling (1). their conserved negative activity. Conversely, studies their positive regulatory their regulator that conducts ytes including lymphocytes, tile erythrocytes and platelets are 45R/B220. CD45R/B220 is widely

Species Reactivity		Species reactivity is dete	rmined by testing in at le	ast one approved ar	polication (e.g., western blot).

**Species Reactivity** 

Species reactivity is determined by testing in at least one approved application (e.g., western blot).

**Applications Key** 

**IF-F:** Immunofluorescence (Frozen) **FC-FP:** Flow Cytometry (Fixed/Permeabilized) **FC-L:** Flow Cytometry

(Live)

**Cross-Reactivity Key** 

H: Human M: Mouse

## **Limited Uses**

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
