1 Kit (6 x 20 microliters)

3 Trask Lane | Danvers | Massachusetts | 01923 | USA

For Research Use Only. Not for Use in Diagnostic Procedures.

Product Includes	Product #	Quantity	Mol. Wt	Isotype/Source
MyD88 (D80F5) Rabbit mAb	4283	20 µl	33 kDa	Rabbit IgG
IRAK1 (D51G7) Rabbit mAb	4504	20 µl	78-105 kDa	Rabbit IgG
IRAK2 Antibody	4367	20 µl	62 kDa	Rabbit
IRAK4 Antibody	4363	20 µl	55 kDa	Rabbit
Phospho-IRAK4 (Thr345/Ser346) (D6D7) Rabbit mAb	11927	20 µl	55 kDa	Rabbit IgG
TRAF6 (E2K9D) Rabbit mAb	67591	20 µl	60 kDa	Rabbit IgG
TBK1/NAK (E8I3G) Rabbit mAb	38066	20 µl	84 kDa	Rabbit IgG
Phospho-TBK1/NAK (Ser172) (D52C2) XP® Rabbit mAb	5483	20 µl	84 kDa	Rabbit IgG
Anti-rabbit IgG, HRP-linked Antibody	7074	100 µl		Goat

Please visit cellsignal.com for individual component applications, species cross-reactivity, dilutions, protocols, and additional product information.

Description

The Myddosome Complex Antibody Sampler Kit provides an economical means of detecting the components of the myddosome complex using phospho-specific and control antibodies. The kit includes enough antibodies to perform two western blot experiments with each primary antibody.

Storage

Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 µg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at -20°C. *Do not aliquot the antibodies.*

Background

Toll-like receptors (TLRs) are a large family of so-called pattern recognition receptors (PRRs) that detect pathogen associated molecular patterns (PAMPs) and danger associated molecular patterns (DAMPs) (1,2). Upon activation, TLRs initiate two main signaling pathways through their C-terminal cytoplasmic Toll/IL-1 receptor (TIR) domain that couples with TIR domain-containing adaptors MyD88 and TRIF. The MyD88-dependent pathway is initiated by the formation of a large oligomeric protein complex termed myddosome. Myddosome is one of so-called supramolecular organizing centers (SMOCs), a signaling organelle that is common for PRRs in the innate immune system. Myddosome formation promotes IRAK4 activation, which in turn activates IRAK1 and later, IRAK2. TRAF6 is then recruited and activated through the binding sites within IRAKs. Activated TRAF6 is released to the cytosol and triggers the IKK complex to activate the NF-κB pathway to mediate the expression of pro-inflammatory cytokines and chemokines (3-7). Recently, it was also found that TBK1 is recruited to the myddosome complex and activated to induce aerobic glycolysis (8).

Limited Uses

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless

separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
