For Research Use Only. Not for Use in Diagnostic Procedures.**Background**

Poly(dA:dT) Sodium Salt, also known as poly(deoxyadenylic-thymidylic) acid sodium salt, is a double-stranded alternating copolymer DNA model with repetitive synthetic sequences of poly(dA-dT):poly(dT-dA). Poly(dA:dT) Sodium Salt plays a role in the innate immune response by binding to pattern recognition receptors (PRRs), which are used by host cells to detect pathogen-associated molecular patterns (PAMPs) (1). This synthetic B-DNA analog can trigger intracellular DNA sensors, such as DDX41, that leads to stimulator of interferon genes (STING) activation, and downstream activation of the transcription factors NF-κB and IRF-3 (2,3). The effect of cytosolic DNA on the innate immune response is particularly important when studying viral infections (1-3).

CAS

86828-69-5

Storage

Store lyophilized at -20°C, desiccated. In lyophilized form, the chemical is stable for 24 months. Once in solution, store at -20°C. *Aliquot to avoid multiple freeze/thaw cycles.*

Directions for Use

Poly(dA:dT) Sodium Salt is supplied as a lyophilized powder. To prepare a 1 mg/mL stock solution, reconstitute the powder in 200 µL sterile, endotoxin-free water. Working concentrations and length of treatment can vary depending on the desired effect.

Limited Uses

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
