## Mouse Transforming Growth Factor $\beta$ 1 (mTGF- $\beta$ 1)

**For Research Use Only. Not for Use in Diagnostic Procedures.**

| MW (kDa):                    | UniProt ID:   | Entrez-Gene Id: |
|------------------------------|---|-----------------|
| 13                           | #P04202   | 21803           |
| <b>Background</b>            | TGF- $\beta$ 1 activities include proliferation, angiogenesis, and promotion or inhibition of many immune events (1-3). TGF- $\beta$ 1 is produced by a number of cell types including regulatory T cells, fibroblasts, epithelial cells, and endothelial cells (3). TGF- $\beta$ 1 binds to T $\beta$ RII homodimer, which then complexes with T $\beta$ RI homodimer (1,4). The oligomeric receptor complex phosphorylates subsets of the Smad proteins that then act to induce and repress a number of target genes (1,3,4). TGF- $\beta$ 1 binding can also activate the Erk2, p38, and JNK pathways via TAK1 (4). TGF- $\beta$ 1 appears to promote late stage progression and metastasis in some cancers (1,2). |                 |
| <b>Endotoxin</b>             | Less than 0.01 ng endotoxin/1 $\mu$ g mTGF- $\beta$ 1.  |                 |
| <b>Purity</b>                | >98% as determined by SDS-PAGE of 6 $\mu$ g reduced (+) and non-reduced (-) recombinant mTGF- $\beta$ 1. All lots are greater than 98% pure.  |                 |
| <b>Source / Purification</b> | Recombinant mouse TGF- $\beta$ 1 (hTGF- $\beta$ 1) Ala279-Ser390 (Accession #NP_035707) was expressed in human 293 cells at Cell Signaling Technology.  |                 |
| <b>Bioactivity</b>           | The bioactivity of recombinant mTGF- $\beta$ 1 was determined by assessing inhibition of IL-4 induced HT-2 cell proliferation. The ED <sub>50</sub> of each lot is between 40-200 pg/ml.  |                 |

### Limited Uses

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
