For Research Use Only. Not for Use in Diagnostic Procedures.

Applications: FC-FP	Reactivity: H	Sensitivity: Endogenous	Source/Isotype: Rabbit IgG	UniProt ID: #P78395	Entrez-Gene Id: 23532		
Product Usage Information		Application Flow Cytometry (Fixed/Permeabilized)			Dilution 1:50		
Storage		Supplied in PBS (pH 7.2), less than 0.1% sodium azide and 2 mg/ml BSA. Store at 4°C. <i>Do not aliquot th</i> antibody. Protect from light. Do not freeze.					
Specificity/Sensit	ivity	PRAME (E7I1B) Rabbit mAb (Alexa Fluor [®] 647 Conjugate) recognizes endogenous levels of total PRA protein.					
Source / Purificat	ion	Monoclonal antibody is produced by immunizing animals with a synthetic peptide corresponding to residues surrounding Gly163 of human PRAME protein.					
Description		This Cell Signaling Technology antibody is conjugated to Alexa Fluor [®] 647 fluorescent dye and tested in-house for direct flow cytometric analysis in human cells. This antibody is expected to exhibit the same species cross-reactivity as the unconjugated PRAME (E7I1B) Rabbit mAb #56426.					
Background		Cancer/testis antigens (CTAs) are a family of more than 100 proteins whose normal expression is largely restricted to immune privileged germ cells of the testis, ovary, and trophoblast cells of the placenta. Although most normal somatic tissues are void of CTA expression, due to epigenetic silencing of gene expression, their expression is upregulated in a wide variety of human solid and liquid tumors (1,2). As such, CTAs have garnered much attention as attractive targets for a variety of immunotherapy- based approaches to selectively attack tumors (3).					
Background Refe	rences	1. Caballero, O.L. and Chen, Y.T. (2009) <i>Cancer Sci</i> 100, 2014-21. 2. De Smet, C. et al. (1999) <i>Mol Cell Biol</i> 19, 7327-35. 3. Gjerstorff, M.F. et al. (2015) <i>Oncotarget</i> 6, 15772-87.					
Species Reactivit	y	Species reactivity is determined by testing in at least one approved application (e.g., western blot).					
Applications Key		FC-FP: Flow Cytometry (Fixed/Permeabilized)					
Cross-Reactivity l	Key	H: Human
