# Extracellular Matrix Dynamics Antibody Sampler Kit

1 Kit (9 x 20 microliters)

**Orders:** 877-616-CELL (2355)  
[orders@cellsignal.com](mailto:orders@cellsignal.com)

**Support:** 877-678-TECH (8324)

**Web:** [info@cellsignal.com](mailto:info@cellsignal.com)

3 Trask Lane | Danvers | Massachusetts | 01923 | USA

**For Research Use Only. Not for Use in Diagnostic Procedures.**

Product Includes	Product #	Quantity	Mol. Wt	Isotype/Source
COL1A1 (E8F4L) XP® Rabbit mAb	72026	20 µl	220 kDa	Rabbit IgG
Tenascin C (E5J3B) Rabbit mAb	33352	20 µl	200, 240 kDa	Rabbit IgG
Thrombospondin-1 (D7E5F) Rabbit mAb	37879	20 µl	170 kDa	Rabbit IgG
Fibronectin/FN1 (E5H6X) Rabbit mAb	26836	20 µl	300 kDa	Rabbit IgG
COL4A1 Antibody	50273	20 µl	200 kDa	Rabbit
SPARC (D10F10) Rabbit mAb	8725	20 µl	42 kDa	Rabbit IgG
Periostin (E5F2S) Rabbit mAb	20302	20 µl	90 kDa	Rabbit IgG
Anti-rabbit IgG, HRP-linked Antibody	7074	100 µl		Goat
COL3A1 (E8D7R) XP® Rabbit mAb	63034	20 µl	200 kDa	Rabbit IgG
CYR61 (D4H5D) XP® Rabbit mAb	14479	20 µl	41 kDa	Rabbit IgG

Please visit [cellsignal.com](http://cellsignal.com) for individual component applications, species cross-reactivity, dilutions, protocols, and additional product information.**Description**

The Extracellular Matrix Dynamics Antibody Sampler Kit provides an economical means of detecting selected proteins associated with dynamic remodeling of the extracellular matrix. The kit includes enough antibodies to perform two western blot experiments with each primary antibody.

**Storage**

Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 µg/mL BSA, 50% glycerol, and less than 0.02% sodium azide. Store at -20°C. *Do not aliquot the antibodies.*

**Background**

The extracellular matrix (ECM) is a three-dimensional macromolecular network composed of collagens, proteoglycans, glycosaminoglycans, elastin, fibronectin, laminins, along with many other proteins and glycoproteins. This network of macromolecules provides a dynamic microenvironment that supports cell and tissue function, and undergoes continuous remodeling during both normal development and disease (1). Remodeling of the ECM can alter the relative balance of macromolecules within distinct ECM subcompartments, with important functional consequences; for example, changes to the relative amounts of COL1A1 and COL3A1 in the interstitial ECM, or COL4A1 and laminins in the basement membrane, can influence cell-matrix interactions, and/or disrupt cellular signaling events (2). Fibronectin functions as a physical and functional bridge between many different ECM components, including collagens, growth factors, and cell surface integrins, and thus plays a critical role in facilitating ECM remodeling. Matricellular proteins (MCPs) are another important group of ECM proteins. MCPs can be categorized into 6 distinct subgroups: centralized coordination network (CCN), thrombospondin (THBS), secreted protein acidic and rich in cysteine (SPARC), tenascin (TN), small integrin-binding ligand N-linked glycoprotein (SIBLING), and y-carboxyglutamate (Gla)-containing proteins. CCN1 (CYR61), SPARC, tenascin C, periostin, and thrombospondin-1 are among the most well-studied of this group. All are non-structural ECM proteins that interact with structural ECM proteins, in part to regulate the rigidity of the ECM. They also play important roles in matrix-cell communication by engaging with cell surface receptors and integrins to elicit intracellular responses. The dysregulation of MCP expression has been associated with the development of numerous disease states, including cancer and fibrosis (4,5).

## Limited Uses

Except as otherwise expressly agreed in a writing signed by a legally authorized representative of CST, the following terms apply to Products provided by CST, its affiliates or its distributors. Any Customer's terms and conditions that are in addition to, or different from, those contained herein, unless separately accepted in writing by a legally authorized representative of CST, are rejected and are of no force or effect.

Products are labeled with For Research Use Only or a similar labeling statement and have not been approved, cleared, or licensed by the FDA or other regulatory foreign or domestic entity, for any purpose. Customer shall not use any Product for any diagnostic or therapeutic purpose, or otherwise in any manner that conflicts with its labeling statement. Products sold or licensed by CST are provided for Customer as the end-user and solely for research and development uses. Any use of Product for diagnostic, prophylactic or therapeutic purposes, or any purchase of Product for resale (alone or as a component) or other commercial purpose, requires a separate license from CST. Customer shall (a) not sell, license, loan, donate or otherwise transfer or make available any Product to any third party, whether alone or in combination with other materials, or use the Products to manufacture any commercial products, (b) not copy, modify, reverse engineer, decompile, disassemble or otherwise attempt to discover the underlying structure or technology of the Products, or use the Products for the purpose of developing any products or services that would compete with CST products or services, (c) not alter or remove from the Products any trademarks, trade names, logos, patent or copyright notices or markings, (d) use the Products solely in accordance with CST Product Terms of Sale and any applicable documentation, and (e) comply with any license, terms of service or similar agreement with respect to any third party products or services used by Customer in connection with the Products.
