Cell Intrinsic Innate Immunity Signaling

Pathway Diagram Key

- Acetylase
- Apoptosis/Cell Death/Death Effector
- Cell Cycle Regulator
- Deacetylase or Histone Deacetylase/Regulator
- GTPase/GTPase Effector
- Metabolic Enzyme
- Methytransferase or C-etylase
- Phosphatase
- Ubiquitin/Ubiquitin Ligase
- Transcription Factor
- Other

Direct Process ••• Tentative Process ———— Translocation Process ••••• Stimulatory Modification ••••• Inhibitory Modification ———— Transcriptional Modification
